SUMMARY

Software Development Engineer with **5+ years** of strong expertise in building payment, credit, and automation systems using Django. Led backend development for a US banking-integrated credit product, reducing transaction latency by 66% and supporting nationwide rollout across all 50 states.

EXPERIENCE

1. BRIGHT MONEY

Bengaluru, India

Software Development Engineer

June 2021 – June 2023

- Built and optimized a high-throughput payment and credit processing system, reducing transaction latency by **66%** using query optimization, caching strategies, and asynchronous task pipelines. Designed and programmed CREDIT BUILDER product, enabling users to improve their credit scores at no additional cost.
- Integrated **CBW Bank (USA)** APIs, enabling the CB product rollout across **all 50 U.S. states**, ensuring compliance and compatibility across banking systems.
- Improved system performance by optimizing **database indexes**, **ORM queries**, and restructuring high-load endpoints.
- Collaborated on architectural design by defining service boundaries, evaluating data models, and participating in performance and reliability reviews.

Software Development Intern

Dec 2020 – June 2021

- Built a Unified Dashboard to support the Customer Success Team, streamlining operations and improving efficiency by **90%**. Automated backend and payment flows using Pytest and integrated test suites into Jenkins CI pipelines, improving development velocity and reducing regression defects.
- Core Stack: Python, Django, Pytest, Prometheus, AWS, Git, Sprinkle Data, Kubernetes**

2. FREELANCER Software Engineer

July 2023 – Present

- Delivered backend systems for 5+ clients in fintech and SaaS domains, building Django-based APIs handling ~10k daily requests and integrating third-party payment and notification services.
- Designed and developed **Django-based REST APIs** for client applications, supporting authentication, payments, and data workflows.
- Improved API response times by **30–50%** through query optimization, caching, and async task processing.
- Integrated third-party services including payment gateways, email services, and external APIs.
- Collaborated directly with founders and frontend developers to translate product requirements into backend architecture.
- Services Offered: Backend API development (Python, Django, REST), Database Query Optimization, Automation & Backend testing.

EDUCATION

Bachelor of Technology - [Computer Science and Engineering](#)

2017-2021

Institute of Engineering and Technology, Lucknow, India

CGPA: **8.05/10**

SKILLS

- ❖ **Core Competencies:** Data Structures and Algorithms, System Design, RESTful APIs, Automation, Microservices
- ❖ **Programming:** Python, C, C++, Java, HTML, CSS
- ❖ **Frameworks/Tools:** Django, Pytest, Bootstrap, Jenkins
- ❖ **Databases:** MySQL, MongoDB
- ❖ **DevOps / Monitoring:** EC2, S3, Prometheus, Grafana, Alertmanager, AWS, Docker
- ❖ **Operating Systems:** Linux, Windows

KEY ACHIEVEMENTS

- Solved **600+ coding** questions on different Coding Platforms including CodeChef, LeetCode, Spoj, and Codeforces.
- Secured **Rank 404** in LeetCode Bi-weekly Challenge among 8,575 participants.
- Ranked **59th out of 7,000+** in National Engineering Olympiad (Round 2).

CERTIFICATIONS

- NPTL – Design and Analysis of Algorithms (Silver)
- HackerRank – Problem Solving Certification (Advance)
